Summary

Software Developer with hands-on experience building backend and full-stack applications using Java, Spring Boot, MySQL, REST APIs, AWS, and React.js. Currently developing backend systems for Chronogram Live, a production mobile application, including authentication, media services, synchronization, and real-time communication. Previously worked as a Full Stack Developer Intern at BackToCode, contributing to the Bank E-Auction Platform using Java, Spring Boot, React.js, MySQL, and AWS.

Experience

CapriTech Global Services **Jan 2026 – Present**
Software Developer *Mumbai, Maharashtra*

- Developing backend services for Chronogram Live, a production mobile application published on the Google Play Store.
- Designing and implementing REST APIs and backend services using Java, Spring Boot, Spring Security, JWT, and MySQL.
- Implemented secure authentication and authorization workflows using JWT and Spring Security.
- Developed backend modules for user management, media handling, synchronization, trips, notifications, and other core application features.
- Implemented real-time chat functionality with conversations, messaging, user blocking, and message read-status handling using WebSocket.
- Worked with AWS infrastructure, including EC2 deployment and S3-based media storage, along with production configuration and troubleshooting.
- Collaborated with Flutter developers to integrate mobile clients with backend APIs and resolve application integration issues.
- Researching and developing offline AI-based image editing and enhancement capabilities for the mobile application.
- Live: chronogram.live

BackToCode Software Company **Jan 2025 – Dec 2025**
Full Stack Developer Intern *Mumbai, Maharashtra*

- Contributed to the development of the Bank E-Auction Platform, a full-stack web application for property listing, bidding, and auction management.
- Developed backend services and REST APIs using Java and Spring Boot, with MySQL for database design and management.
- Implemented role-based access control supporting multiple user roles, dashboards, and permissions.
- Developed registration, approval, authentication, and verification workflows for platform users.
- Implemented auction lifecycle management and bidding functionality for property auctions.
- Developed React.js frontend functionality and integrated frontend components with backend REST APIs.
- Worked on OTP authentication, WhatsApp notification integration, and deployment-related activities.
- Contributed to AWS-based application deployment and infrastructure configuration.
- Live: banke-auction.com

Projects

SureMSG | *React.js, Tailwind CSS, JavaScript*

- Developed a responsive business website for a WhatsApp and RCS messaging service platform.
- Built modern user interfaces focused on customer engagement, lead generation, and responsive design.
- Integrated API-based workflows for inquiry and contact handling.
- Optimized frontend performance and user experience using React.js and Tailwind CSS.
- Live: suremsg.in

Technical Skills

Languages: Java, JavaScript, SQL, Dart
Backend: Spring Boot, Spring Security, Spring Data JPA, Hibernate, REST APIs, JWT, WebSocket
Frontend: React.js, Next.js, Tailwind CSS, HTML, CSS
Mobile: Flutter
Database: MySQL
Cloud & Tools: AWS EC2, AWS S3, Git, GitHub, Postman, VPS
Concepts: Authentication, Authorization, RBAC, API Design, Real-Time Systems, Microservices

Education

University of Mumbai **2022 – 2025**
B.Sc. Information Technology – CGPA: 8.56 *Mumbai, Maharashtra*
